

## REMARKS

The amendment in Paragraph [0010] is a correction of a minor clerical errors, the need for which is apparent from Office records. The list of patents and applications in this Paragraph is stated to be E Ink and MIT patents relating to electrophoretic displays. U.S. Patent No. 6,249,721 is not assigned to either E Ink or MIT and does not relate to this technology. Hence, correction is obviously required, and Office records show that the correct Patent No. 6,249,271 must be intended.

The remaining amendments are corrections of clerical and drafting errors the need for which should be obvious from the context. The amendments in Paragraph [0019] both correct an obvious clerical error and transfer the definition of the abbreviation "MEMS" from Paragraph [0063] where it was originally placed to Paragraph [0019], the first occurrence of the abbreviation. Consequential changes have been made in Paragraph [0063]. Finally, the words "the aforementioned" have been deleted from Paragraph [0090] since there is no previous reference to the published patent application cited in this paragraph, and the words "US Patent Application Publication No." have been added to alert those not familiar with this type of document to the exact type of document being cited.

No new matter is introduced by any of these amendments.

Respectfully submitted
